A Houston Car Accident Lawyer Who Knows How to Get Results

Rear-end auto accidents have become increasingly common in Texas. That's because so many people are often not paying attention to the road while they're driving. Distracted driving accidents often go hand in hand with rear-end accidents. In particular, many people text and drive at the same time, causing serious rear-end collisions.

You need a Galveston car accident lawyer at Hagood & Neumann who has handled many rear-end accident cases throughout Texas in the past three decades. Such cases often seem straightforward. But Hagood & Neumann knows very well, most cases turn out to be much more complicated. Insurance companies are often to blame. That's because they're often focused on one thing: paying people as little as possible for their injuries. They may try to downplay the impact of the accident. We put experience and resources to work to show the insurance company how serious the injury actually is.

Car accident injuries caused by rear-end accidents cover a wide range. Some of the most common ones include back and neck injuries. We have also dealt with serious passenger injuries caused by rear-end accidents.
